

SUMMARY

Software engineer and product leader who builds products end to end. Currently Head of Technology & Product at Cherry SMS, where I rebuilt a dead platform into a live product serving 100+ customers. Full stack, AWS, data engineering, and machine learning, with real ownership of product and business outcomes.

SKILLS

Languages & ML: Python, PyTorch, Machine Learning, JavaScript/TypeScript, Swift, C/C++

Full-Stack: React, React Native, Next.js, Node.js, Vue.js, Angular

Cloud (AWS): CloudFormation, SAM, Lambda, EC2, Aurora, S3, Docker, Vercel

Data: PostgreSQL, DynamoDB, MongoDB

Integrations & Automation: Twilio, Salesforce, Selenium, n8n

Tools: Git, Postman, Xcode

Spoken: French (Native), English (Fluent)

WORK EXPERIENCE

Cherry SMS - Miami, Florida

Head of Technology & Product • OCTOBER 2025 - PRESENT

- Rebuilt a dead SMS platform from scratch into a live product serving **100+ customers** within months of launch, owning engineering, product, data, design, and customer operations.
- Architected the full backend on **AWS** (CloudFormation, Lambda, EC2, Aurora PostgreSQL, DynamoDB), integrating Twilio and other APIs for account creation, phone provisioning, campaigns, and high volume messaging.
- Built and trained a custom **PyTorch** model on **millions of messages** to classify inbound replies and surface high intent conversations.
- Designed and engineered the entire data layer for performance and scale, and owned end to end security with AWS security groups and Secrets Manager.
- Engineered the system for high volume bulk messaging while staying **compliant with carrier regulations**.
- Built an internal intranet for the team, self hosted on EC2, with dashboards, data tooling, and n8n automation.

Debt Consultants Group - Miami, Florida

Software Engineer / Product Manager • OCTOBER 2024 - SEPTEMBER 2025

- Independently designed and built the company's lead generation and internal operations systems end to end, working alongside the Salesforce CRM team.
- Built a full client onboarding portal (**Next.js, Node.js, AWS**) integrated with Salesforce and LeadTrac, with multi tier admin views and a scalable infrastructure on CloudFormation, Lambda, DynamoDB, and S3.
- Developed a suite of **Python** scrapers: an AI driven Reddit tool for business debt leads, a Yellow Pages scraper producing **1M+ contacts**, and a courthouse scraper pulling live legal filings across Miami and New York.
- Built a Python reporting system that consolidated performance across three offices, **saving 4 hours of manual work daily**.
- Established coding standards, GitHub workflows, and agile practices, and aligned technical solutions with Sales, Underwriting, and Executive teams.

Immopad - Freelance, Miami, Florida

Freelance Full-stack Developer • MARCH 2024 - AUGUST 2024

- Contracted by Air-loc (ImmoPad) to build and extend KeyToCheck, their **Angular** tool for managing traveler arrivals, departures, and property condition reports for short-term rentals, on a platform serving **1,500+ clients**.

Pandalab - Nancy, France

Full Stack Developer Intern • SEPTEMBER 2023 - FEBRUARY 2024

- Extended a **Vue.js** healthcare platform coordinating communication between practitioners, organizations, and patients. Built new features including an advanced statistics module and reworked existing pages to improve the user experience.

Alerion - Nancy, France

Software Engineer Intern • APRIL 2022 - JULY 2022

- Programmed a Boston Dynamics Spot robot in **Python** to detect and open door handles autonomously for emergency response, building the computer vision pipeline with **YOLOv5** and **OpenCV**.
- Built a **React** app rendering a real-time digital terrain model over a 2D base map, then extended it into a 3D web visualization.

Junior Conseil Taker - Nancy, France

Project Manager • SEPTEMBER 2021 - JULY 2022

- Managed IT projects for external clients at Epitech's student consultancy: prospected and signed contracts, wrote specifications, and bridged the development team and clients through delivery.

Mydomus - Metz, France

Front-End Developer Intern • SEPTEMBER 2021 - MARCH 2022

- Built **Angular** features for a real-estate rental platform, including a cross-device login-history view and a listing flow publishing simultaneously to Le Bon Coin, SeLogger, ParuVendu, and Facebook.

PricewaterhouseCoopers - Luxembourg City, Luxembourg

Business Intelligence Team Support Intern • JULY 2020 - DECEMBER 2020

- Built an **Alteryx** application consolidating Excel files into a single CSV, and migrated **104 database models** from Erwin to IBM InfoSphere Data Architect.

E D U C A T I O N

Master's degree in Computer Science & Programming

Epitech (European Institute of Technology) - Paris, France • SEPTEMBER 2022 - SEPTEMBER 2024

Certificate in Technology Challenges in the Financial Industry

The New School Center For Media - New York City, United States • SEPTEMBER 2022 - JULY 2023

Bachelor's degree in Computer Science & Programming

Epitech (European Institute of Technology) - Nancy, France • SEPTEMBER 2019 - AUGUST 2022

P R O J E C T S

Vakary - iOS travel app (Epitech capstone)

- Led a team of ten across multiple time zones over three years to build a trip-planning app that generates personalized itineraries. Pitched to investors.
